Before applying for financial aid, students and parents should assess all the costs of attending school. Above is an estimate of living expenses to assist you in determining what you'll need to meet all costs of education, both direct (tuition, books, fees) and indirect (housing, transportation, personal).

Each award year, we obtain nationally established averages from the College Board to create our student budgets. Budget means the costs associated with your attendance *each academic year*, ranging from room and board, meals, and transportation, to miscellaneous items, and including estimated tuition, books and supplies, and fees. Programs more than one academic year in length have similar costs for each academic year.

This is an example of one academic year; that is how tuition is charged and financial aid is packaged. You will find specific current tuition and fee information for the program in which you are interested on your enrollment agreement and in the catalog. A tuition and fee summary for each program (updated annually), as well as estimated cost of attendance, is also available on our consumer information websites. Remember, if your program is longer than one academic year, consider costs for *each* academic year of your program.
